

Open letter from scientists to Rt Hon Greg Hands, Minister of State for Energy, Clean Growth and Climate Change

We are deeply concerned about Mr Angus Rose, a software engineer from London, who is on an indefinite hunger strike outside the Houses of Parliament since 14th March. He is asking that members of the House of Commons receive a briefing from the Government Chief Scientific Adviser, Sir Patrick Vallance, on the risks of and solutions to the climate crisis. He is also asking for this briefing to be televised.

Mr Rose is driven by his fear for the future of his young niece and nephews. We are not all in agreement with the tactic of a public hunger strike. However, we can unanimously support the idea of policy makers receiving the latest scientific evidence on the climate and ecological crises and its solutions. As you might know, from a paper published in *Nature* just before COP26, most climate scientists are now anxious about the future and expect to see catastrophic changes in their lifetimes¹.

Faced with a similar demand recently, the Swiss Federal Assembly agreed to receive a briefing from scientists about the climate and ecological crisis.

The crisis is evolving at a rapid pace and it is increasingly difficult for politicians to understand the significance of the latest science that they do not have time to read and digest. We all saw and appreciated the work done by the Government Chief Scientific Adviser during the height of the Covid19 crisis. We are convinced that a similar briefing on the climate and ecological crises would help our leaders to enact the right policies to decarbonise our society at the required pace, while also preserving biodiversity.

Yours sincerely,

1. Simon Lewis, Professor of Global Change Science, University College London, UK.
2. Hayley J. Fowler, Professor of Climate Change Impacts, Director of the Centre for Climate and Environmental Resilience, School of Engineering, Newcastle University, UK.
3. Benjamin K. Sovacool, Professor of Energy Policy, University of Sussex, UK.
